Description: The Colorado Forest Restoration Institute at Colorado State University is hiring experienced research and monitoring field technicians to assist with field data collection and management in support of our research and monitoring field studies. These are full-time positions from May through September 2020, with potential for extension dependent upon funding. Crews work 10-hour field days, frequently traveling overnight for 4-day trips to lodge near field sites. Benefits include competitive health insurance options and per diem when traveling.

About CFRI: The Colorado Forest Restoration Institution (CFRI) is a Congressionally-authorized program within the Department of Forest & Rangeland Stewardship at Colorado State University with the mission to develop, compile, synthesize, and apply locally-relevant science-based knowledge to achieve forest restoration and wildfire mitigation goals. The geographic focus of the Institute is the State of Colorado, the U.S. South-west, and the U.S. Intermountain West. Visit the CFRI website for more info about our mission and work.

www.cfri.colostate.edu

Required Qualifications:

- B.S. in Ecology, Forestry, Natural Resource Management, or a related field of study and demonstration of 1+ years of related field experience, or M.S. degree in a related field of study.
- Coursework and/or experience measuring trees and forest characteristics, fuels, herbaceous vegetation, and working outdoors.
- Must have a valid driver's license or the ability to obtain a driver's license by the employment start date.

Preferred Qualifications:

- One or more years of experience implementing diverse ecological, forestry, and fuels field sampling methods, and knowledge of sampling equipment, procedures and QA/QC protocols. Familiarity with sampling methods and procedures implemented on CFRI research and monitoring projects is highly desirable.
- Experience safely conducting fieldwork in remote locations, preferably in Colorado or dry western forests, including navigating across arduous terrain with topographic maps, compass, and GPS technology, working in adverse conditions, and with frequent travel and unusual schedules. First-aid and CPR certification, wilderness first aid, or similar advanced certification desired.
- Demonstrated proficiency identifying vascular plants. Experience with Rocky Mountain flora desired.
- Basic proficiency using ArcGIS software to create maps.
- Experience with data entry and data QA/QC protocols to support ecological and forestry research. Knowledge of Microsoft Excel highly preferred, familiarity with Microsoft Access and R also desired.
- High-quality oral and written communication skills with keen attention to detail.
- Ability to implement inclusion practices for effective communication across cultural boundaries and work harmoniously with diverse groups of students, faculty, and staff, and stakeholders outside the university setting.

Essential Duties

Job Duty Category	Logistical Planning
Duty/Responsibility	Assist with developing and carry out daily data collection plans by studying project maps and documents and communicating with crew leader to safely and efficiently meet project goals.
Percentage Of Time	5
Job Duty Category	Field Data Collection
Duty/Responsibility	Conduct field data collection through proficient knowledge and application of field safety principles, team skills, orienteering skills, sampling tools, monitoring protocols, and quality assurance techniques to ensure monitoring data is collected safely while maintaining a high standard for quality, productivity, and morale. Locate long term monitoring plots by safely navigating over arduous terrain using maps, compass, GPS, and photographs, often in adverse weather conditions. Collect tree, fuels, and understory vegetation data in southern Rocky Mountain conifer forests following standard protocols. Sampling tools include loggers tapes, prisms, clinometers, hypsometers, densitometers, digital cameras, sampling frames, photoload templates, calipers, and handheld computers. Occasionally communicate with members of partnering agencies and the public to exchange knowledge on topics relating to forest restoration practices, outcomes, and monitoring.
Percentage Of Time	75
Job Duty Category	Laboratory Work
Duty/Responsibility	Conduct biomass processing, plant identification, and maintenance and organization of field gear with effective communication and organization skills to ensure efficiency and data quality.
Percentage Of Time	10
Job Duty Category	Data Management
Duty/Responsibility	Support quality assurance, organization, and storage of field data in field and lab settings by using digital data collection devices, Microsoft Excel, Microsoft Powerpoint, Microsoft Word, R, and effectively communicating with crew leaders and other CFRI staff.
Percentage Of Time	10

Diversity Statement: Reflecting departmental and institutional values, candidates are expected to have the ability to advance the Department's commitment to diversity and inclusion.

EEO Statement: Colorado State University is committed to providing an environment that is free from discrimination and harassment based on race, age, creed, color, religion, national origin or ancestry, sex, gender, disability, veteran status, genetic information, sexual orientation, gender identity or expression, or pregnancy and will not discharge or in any other manner discriminate against employees or applicants because they have inquired about, discussed, or disclosed their own pay or the pay of another employee or applicant. Colorado State University is an equal opportunity/equal access/affirmative action employer fully committed to achieving a diverse workforce and complies with all Federal and Colorado State laws, regulations, and executive orders regarding non-discrimination and affirmative action. The Office of Equal Opportunity is located in 101 Student Services.

Background Check Policy Statement: Colorado State University (CSU) strives to provide a safe study, work, and living environment for its faculty, staff, volunteers and students. To support this environment and comply with applicable laws and regulations, CSU conducts background checks. The type of background check conducted varies by position and can include, but is not limited to, criminal (felony and misdemeanor) history, sex offender registry, motor vehicle history, financial history, and/or education verification. Background checks will be conducted when required by law or contract and when, in the discretion of the university, it is reasonable and prudent to do so. Conditions of Employment Pre-employment Criminal Background Check (required for new hires).
